

# Nylon 6 Cast | material information

## Nylon 6 Cast

### Product full identity:

#### Nylon 6 / Polyamide 6 (PA 6)

Nylon 6 Cast is stress-relieved and has improved properties when compared to Nylon 6 Extruded. It offers high mechanical strength, stiffness and hardness. Nylon 6 Cast also has good wear resistance, heat aging properties and machinability.

## Properties

- High strength and stiffness
- Good creep resistance
- Easily machined
- High wear and heat resistance
- Good temperature range (+105 to -30°C)

## Applications

- Gears
- Bushes
- Washers
- Applications that requires wear resistance

## Forms

Solid Rod

Sheet
